

Description: USP® WALKBOARD is a composite adhered modified bitumen sheet consisting of a smooth underside and a granule top side. Each layer is manufactured with a heavyweight polyester mat designed and constructed to be strong, while remaining wrinkle resistant. The USP® WALKBOARD is available in two types: USP® APP WALKBOARD which is made from APP modified bitumen membranes and USP® SBS WALKBOARD which is made from SBS modified bitumen membranes. Both are designed for use as a designated walkway for built-up and modified bitumen roofs.

Surface Preparation: All surfaces to be adhered must be clean, dry and free from any foreign matter, such as oil, grease, dirt or any debris that could inhibit the bonding to the substrate.

Application Method: USP® APP WALKBOARDS are designed to be torch applied. USP® SBS WALKBOARDS may be mopped or adhered with SBS adhesive.
