

USP® ROOFING GRANULES

Technical Data Sheet

Product Name: USP® ROOFING GRANULES

Classification: Roofing Granules

Product Description: USP® Roofing Granules are made from 3M™ Classic Roofing Granules and are designed to match the granule surfacing of U.S. Ply membranes such as DuraFlex®, DuraFlex® TG SBS, DuraWeld®, TuffCap® APP/SBS, and USP® 160 APP/SBS. USP® Roofing Granules are a unique, natural mineral product, the only type of roofing granule that meets the toughest test of time, weather and the marketplace.

Our granules are dense and non-porous, resist ultra-violet light and are tough enough to stand up under handling. And they hold the long-lasting ceramic coatings added to create the ever-growing selection of colors demanded by the roofing market.

Reflective Ultra White granules are made from a proprietary coated granule designed to match the granule surfacing of reflective membranes such as DuraFlex® SBS, DuraFlex® TG SBS, and DuraWeld® APP. The reflective CRRC rated granule color for use with 0872-0009 and 087-0010 listed products.

Product Data: USP® Roofing Granules (specify color). Available in a 5 gal pail weighing approximately 45 lbs (20.4 kg) per pail. Reflective Ultra White granules are available in a 5 gal pail weighing approximately 32 lbs (14.5 kg) per pail.
